

DAIRYLAND
Laboratories, Inc.

Media Release

April 22, 2022

FOR IMMEDIATE RELEASE

Dairyland Laboratories Inc. Purchases Feed and Forage Testing Services From DHIA Laboratories

Dairyland Laboratories announces that it has purchased feed and forage testing services from DHIA Laboratories in Sauk Centre, MN. DHIA Laboratories will continue to provide milk and testing independent of Dairyland Laboratories.

Kyle Taysom, CEO with Dairyland Laboratories, says, “This acquisition re-emphasizes our commitment to servicing this key dairy market through a sustainable business model that emphasizes local service with the expertise and technical support of an international network.”

Starting Monday, April 25, 2022 samples will be tested at Dairyland’s Sauk Rapids, MN laboratory location. Customers with questions about test packages can call the lab at 320-240-1737.

A family-owned business since 1958, Dairyland Laboratories provides extensive analysis of feed, forage, water, molds, and mycotoxins across the United States as well as internationally.

Note to the Editor:

About Dairyland Laboratories

Founded in 1958, Dairyland Laboratories is a leading agriculture testing laboratory headquartered in Arcadia, Wisconsin with satellite laboratories in Stratford and De Pere, Wisconsin and St. Cloud, Minnesota, Battle Creek, MI and Jerome, ID. In addition, Dairyland analyses are provided by partner labs in more than 40 locations throughout the U.S. and abroad. The staff of more than 80 chemists and trained technicians use wet chemistry and near infrared (NIR) testing methods to deliver important information to agriculture producers, nutritionists and crop consultants, feed companies, researchers, crop geneticists and equipment manufacturers worldwide.
